B.Sc. in Information Technology

King Mongkut's University of Technology Thonburi (KMUTT), Thailand
2014–2018 | **Second-Class Honors**

Upper-Intermediate English

Shafston International College, Brisbane, Australia
2018

PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 7+ years delivering high-performance web platforms using React/Next.js, Vue/Nuxt, and Node.js.
Focused on scalable architecture, performance optimization, and modern CI/CD workflows.

WORK EXPERIENCE

Frontend Developer — HFM (HF Markets)

On-Site — Aug 2025 – Present

- Built SEO-optimized SSR/ISR marketing pages improving Lighthouse performance scores and search discoverability.
- Developed high-performance localized campaign platforms for Asian markets using Next.js, TypeScript, and Tailwind
- Collaborated with global backend and HQ teams for cross-region platform integrations and APIs

Freelance Full-Stack Developer

Full Time — Mar 2022 – Jul 2025

- Built and delivered full-stack platforms for startups and client products using Next.js/Nuxt + Node.js APIs.
- Integrated Auth0 OAuth2 SSO, reducing login-related support issues by ~40%.
- Implemented CI/CD via GitHub Actions, reducing deployment time from ~15 to ~4 minutes.
- Wrote 120+ unit/integration tests (Vitest/Cypress), reaching ~92% coverage.

Frontend Developer — Zrch (Hjem.no)

Full Time — Jul 2021 – Mar 2022

- Developed core marketplace features including map-based property discovery, search, and dynamic filtering.
- Built internal advertising and admin dashboards used by marketplace operators.
- Designed reusable Vue component systems improving development velocity across the product team.

Full-Stack Developer (Contract) — Apar Technologies (The 1 Central Team)

Full Time — Oct 2020 – Jun 2021

- Developed Nuxt-based customer experiences and Node.js/Express BFF services.
- Built campaign and loyalty features for enterprise-scale customer engagement platform.

Contract /Freelance Developer — Client Projects

Full Time — Jan 2019 – Oct 2020

- Built CRM/back-office and logistics booking workflows across Vue frontend and backend integrations.
- Developed production business modules for inventory, sales, and operational tools.

REAWPAI CHUNSOI

FRONT-END DEVELOPER

SELECTED PROJECTS

Hjem.no - Real Estate Marketplace

Tech: Vue 3, Vite, TypeScript, REST, map integration.
Team size: 10 - 15

- Delivered property listing discovery features, including advanced search and filtering UX, along with internal ads and admin management tools for the real estate marketplace platform.
- Refactored a monolithic frontend into modular micro-frontends, improving page load speed by 55% and reducing bundle size by 40%.
- Applied domain-driven design principles and reusable component architecture to support long-term scalability and faster feature development.

The 1 Platform - Loyalty Ecosystem

Tech: Nuxt, Vuex, Vuetify, Docker, Jenkins
Team size: 20 - 30

- Delivered full-stack loyalty campaign and member-engagement features, enabling marketing teams to launch and manage promotional programs efficiently.
- Improved web accessibility and usability, raising Lighthouse accessibility score to 96/100 and reducing bounce rate by 18%.
- Integrated Jenkins CI/CD pipelines to automate build and deployment processes, reducing manual deployments by 75% and improving release reliability.

HFM - Campaign Ecosystem

Tech: Next.js, TypeScript, Tailwind, SEO
Team size: 20 - 30

- Built localized promotional pages with a strong focus on performance, SEO, and discoverability, improving page load speed and search visibility across multiple regions.
- Implemented scalable and reusable frontend components to support rapid development of marketing campaigns and localized content.
- Optimized asset loading, responsive layouts, and accessibility, ensuring fast and consistent user experiences across devices and international markets.

Picross - Browser Puzzle Game + Solver Engine

Tech: Nuxt 3, TypeScript, Pinia, monorepo package architecture.
GitHub: github.com/phaicom/picross

- Developed a browser-based Picross puzzle game with an interactive grid UI, real-time validation, and responsive gameplay using modern web technologies.
- Implemented a Picross solver engine capable of automatically solving puzzles using constraint-based logic and optimization algorithms.
- Designed a clean and modular architecture to support puzzle generation, solving visualization, and smooth user interaction in the browser.
