

REAWPAI CHUNSOI

Senior Full Stack Developer

064-240-7662 | reawpai.chunsoi@gmail.com | github.com/phaicom | resume.phaicom.xyz

Professional Summary

Senior Full Stack Developer with 9+ years of experience building and maintaining production web platforms with React, Next.js, Vue, Nuxt, and Node.js. Delivers reusable, internationalized customer-facing experiences with a focus on performance, maintainable architecture, REST APIs, and CI/CD automation.

Technical Skills

- Languages: TypeScript, JavaScript, SQL, Go
- Frontend: React, Next.js, Vue 3, Nuxt, Tailwind CSS, Material UI, Vuetify, CSS/SCSS
- Backend: Node.js, Express, NestJS, Fastify, REST APIs, GraphQL, gRPC
- Data: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB
- Cloud & DevOps: AWS (ECS, S3, CloudFront, RDS), Docker, GitHub Actions, GitLab CI, Jenkins
- Testing: Vitest, Jest, Testing Library, Cypress
- Architecture: Monorepos, microservices, BFF, SSR/ISR/SSG, CMS-driven development, localization/i18n, SEO, performance optimization

Professional Experience

Front-End Developer | HFM (HF Markets)

Aug 2025–Present | On-site

- Develop and maintain production promotional and campaign websites using React, Next.js, TypeScript, and Tailwind CSS for an international financial-services company.
- Translate Figma designs into responsive, reusable UI components for mobile, tablet, and desktop campaign experiences.
- Implement country- and regulator-specific behavior, including routing, localization, campaign timing, CTA visibility, redirects, and localized content.
- Integrate CMS-driven content and REST APIs into maintainable frontend experiences with shared component patterns.
- Contribute to HFM's careers and corporate websites by delivering UI enhancements, localized content, responsive behavior, and cross-browser fixes in large production codebases.
- Contribute to shared frontend libraries that standardize routing, redirects, localization, and common web behavior across HFM applications; support production quality through performance-conscious asset handling, CI/CD, Docker, and AWS-hosted services.

Freelance Full-Stack Developer

- Built and delivered full-stack platforms for startups and client products using Next.js/Nuxt and Node.js APIs.
- Integrated Auth0 OAuth2 SSO, reducing login-related support issues by approximately 40%.
- Implemented CI/CD with GitHub Actions, reducing deployment time from approximately 15 to 4 minutes.
- Wrote 120+ unit and integration tests with Vitest and Cypress, achieving approximately 92% coverage.

Front-End Developer | Zrch (Hjem.no)

Jul 2021–Mar 2022 | Full-time

- Developed core marketplace features including map-based property discovery, search, and dynamic filtering.
- Built internal advertising and administrative dashboards used by marketplace operators.
- Designed reusable Vue component systems that improved development velocity across the product team.

Full-Stack Developer | Apar Technologies (The 1 Central Team)

Oct 2020–Jun 2021 | Full-time

- Developed Nuxt-based customer experiences and Node.js/Express BFF services.
- Built campaign and loyalty features for an enterprise-scale customer-engagement platform.

Contract / Freelance Developer | Client Projects

Jan 2019–Oct 2020 | Full-time

- Built CRM, back-office, and logistics-booking workflows across Vue frontends and backend integrations.
- Developed production business modules for inventory, sales, and operational tools.

Selected Projects

HFM Websites — Campaign, Careers, and Corporate Platforms

- Develop and maintain localized campaign, careers, and corporate web experiences for HFM across multiple countries and regulatory regions.
- Implement reusable React and Next.js components, CMS/API integrations, routing, localization, and country-specific user flows.
- Contribute to shared frontend libraries that support consistent routing, redirects, language handling, and common behavior across web applications.
- Tech: React, Next.js, TypeScript, Tailwind CSS, REST APIs, CMS, localization/i18n, AWS, Docker, CI/CD

Zrch (Hjem.no) — Real Estate Marketplace

- Delivered property-discovery features, including map-based search, dynamic filtering, internal advertising, and administrative workflows.
- Refactored a monolithic frontend into modular micro-frontends, improving page load speed by 55% and reducing bundle size by 40%.
- Applied domain-driven design principles and reusable Vue component architecture to support long-term scalability and feature development.
- Tech: Vue 3, Vite, TypeScript, REST APIs, map integration

The 1 Platform — Loyalty Ecosystem

- Delivered full-stack loyalty-campaign and member-engagement features that enabled marketing teams to launch and manage promotional programs.
- Improved accessibility and usability, raising the Lighthouse accessibility score to 96/100 and reducing bounce rate by 18%.
- Integrated Jenkins CI/CD pipelines to automate build and deployment processes, reducing manual deployments by 75% and improving release reliability.
- Tech: Nuxt, Vuex, Vuetify, Docker, Jenkins

Picross — Browser Puzzle Game and Solver Engine

- Developed a browser-based Picross game with an interactive grid UI, real-time validation, and responsive gameplay.
- Implemented a solver engine that automatically solves puzzles using constraint-based logic and optimization algorithms.
- Designed a modular architecture supporting puzzle generation, solving visualization, and smooth browser interaction.
- Tech: Nuxt 3, TypeScript, Pinia, monorepo package architecture
- GitHub: github.com/phaicom/picross

Education

B.Sc. in Information Technology, King Mongkut's University of Technology Thonburi (KMUTT), Thailand

2014–2018 | Second-Class Honours

Upper-Intermediate English, Shafston International College, Brisbane, Australia

2018

Languages

- Thai — Native
- English — Fluent (professional working proficiency)
